In light of the US Capitol's assault: solidarity with the forces that fight against the extreme right wing in USA

7th January 2021

The assault on US Capitol, instigated by Trump, is the last act of the dangerous radicalization of the north American right wing after years of lies and hate incitement, power outrages seen as war trophies, disdain for other's lives and police abuses, indifference about the suffering of Afro American communities and haughtiness and arrogance in face of the rest of the world.

The attempt of stopping Biden's nomination as new president of the country occupying the Congress has caused the death of four people, with Washington on an emergency condition and the country deeped into the pandemic catastrophe. The undeniable responsibility of Trump in the assault, his disdain and his disrupted aggressiveness are revealing the neofascist character of his mandate and his inclination in favor of force acts to impose his will.

Capitol assailants, as many other Trump's followers, are a mixture of white workers, unsatisfied nationalists, racist supportives of segregation, maddening QAnon followers, citizens who fear immigration snatches their rights and work; an amalgam which also includes the extreme right wing, Proud Boys bullies, slaver flag bearers, furious evangelists, National Rifle Association militants, farming owners, speculators and distressed bourgeoisie facing a new world where United States cannot impose its conditions, and that globally, form a considerable share of north American population.

The seriousness of the Congress attack must not be omitted. Although the assault launched by Trump opens a crisis on the Republic Party, fractured by the attack and the drift and fanaticism of the outgoing president, the hate seeds, the intolerance, the bigotry, are sown and they have become ingrained on millions of Americans, adding to this dark and brutal north American patriotism which has always celebrated military interventions overseas.

United States contemplates now the consequences of a politic that has been applied out of their frontiers for decades. The manipulation of campaigns and the questioning of electoral processes is, on the other hand, something that United States has always done, denying the recognition of triumphs on ballot boxes when they didn't correspond to their interests, and organizing coup d'état and operations to depose governments, from the postwar Italy to the Guatemala of Arbenz, from the Iran of Mosaddeq to the Indonesia of Surkano, from the Chile of Allende to the Venezuela of Chávez, from Ukraine to Belorussia, among other examples of interference.

Today, this international of extreme right wing that has formed a group around Trump, and that is composed by Bolsonaro, Modi, Netanyahu, Orbán, Kaczyński, Salvini, Le Pen, Erdogan, Al-Sisi, Duterte, among others, as the VOX representers in the Spanish Cortes, not only suppose a threat to freedom, but also a risk for coexistence, for life: it must not be forgotten that fascists Falange and nazi squadrons grew up in the center of fanaticism, dissatisfaction and violence.

The discredit of the liberal democracy, based on the power of money, prisoner of plutocracy and the radicalization of unscrupulous rulers, also hides the big fraud and the plundering to which the working classes and all popular classes have been suppressed. Nobody must undervalue the risks we are facing. The assault to the Parliament, the threat of taking the arms, the use of the rudest lies, the nonstop manipulation aggravated by the crisis of capitalism, show the character of that extreme right north American wing and also, of that which has boosted in different countries.

The PCE shows its satisfaction for the definitive star of Trump Administration, although it maintains its doubts about that Biden's Presidency will mean deep changes on USA foreign and domestic politics, so:

1. It shows its solidarity to political and social forces from USA which define themselves as socialists, defending advanced policies socially and fighting against racist and violent organizations of the extreme American right wing.
2. It renews its call to make progress on international convergence processes between political and social democratic and left forces to unite on the defense of a new international order of multipolar character which puts a turning point to illegal blocks that the USA maintain against the Estates which have not been subjected to their interests and fight for hegemony to the international neofascism that Trump and his allies are organizing.
