Urgent Statement of the Political Bureau of the PCPE

During the second day of strike in the plant of Amazon in San Fernando de Henares (Madrid), two people have been arrested after several police charges, one of them Hugo Carrasco, Secretary of Organization of the Regional Committee of the PCPE in Madrid.

These arrests, together with the police charges against the pickets, prove the degree of violence the repressive forces are capable of exerting against workers in one moment of utmost conflict with the employer's union.

We denounce the attitude of Amazon, which does not hesitate to hire strike breakers against the huge follow-up of the strike, and the campaign it is carrying out, with the complicity of many mass-media, to silence the strike and shut the struggling staff up, as well as the violence exerted against those who exert their legitimate right to struggle for worthy labour conditions.

We denounce the role of the Government Delegation in Madrid, now held by social-democracy, which does not hesitate to repress workers' mobilizations and to defend the interests of big monopolies like Amazon.

We call to participate in the clustering that will take place this evening, at 18.00, in front of the police station of Coslada and to raise solidarity among workers all over the country, to demand the immediate release without charges of both fellows, whose only crime has been to lead the struggle for the rights of the working class against one employer's union.

Madrid, July 17th, 2018

Political Bureau of the CC of the PCPE.
